

Office Systems & Technology
Chapter 1 – D

1. E - ARPANET
2. F - Charles Babbage
3. D - Jack S. Kilby
4. B - John Antanasoff
5. A - Stored Program Concept
6. C - Ted Hoff
7. G - World Wide Web

| <ol style="list-style-type: none">A. A software program could be stored in primary storage with the CPU accessing the software instruction in sequence and performing required processing.B. Federal court considered the true inventor of the first electronic computer.C. Introduced the microprocessor in 1971.D. Invented the first integrated circuit.E. Sponsored a project to electronically link scientists from two different locations.F. The “Father of Computers”G. The foundation for Internet communications and service. |
|---|

Determine if the following was an attribute of: (F) The First Business Computer or (N) A New Generation Computer

8. N - Internal storage consisted of a magnetic core
9. F - Internal storage consisted of a magnetic drum.
10. N - Internal storage was supplemented with secondary storage through the use of magnetic tape.
11. F - Mainly used for payroll, billing and accounting.
12. F - Punch cards were used for input.
13. N - The main logic element consisted of transistors.
14. F - The main logic element consisted of vacuum tubes.

15. Three significant innovations in the microcomputer evolution include:
 - A. The first microcomputer
 - B. The Apple microcomputer
 - C. The IBM PC, clones and MS-DOS
